SKY TRANSFERS

Your partner booking portal

A step-by-step guide for travel agents, DMCs, hotel concierge and corporate accounts.

Your Sky Transfers partner account gives you your own booking portal. You book your client's transfer yourself, at the same fares our website charges, hand the passenger a voucher, follow the trip on the day, and see your invoices and what you have earned. Nothing to install, nothing to pay at the time of booking.

This guide covers the whole thing end to end. It takes about five minutes to read, and about a minute to make your first booking.

> **BEFORE YOU START**
>
> You need two things from us: your agent code and your PIN.
>
> If you do not have them yet, email info@skytransfers.com.au with your agency name and a contact number. We usually have you set up the same day.

Once you are in, you can:

- Book any trip - an airport, any street address, hotel to restaurant, by the hour, a return, with up to three stops on the way - with every vehicle priced the moment you choose.
- Download a passenger voucher, which carries no prices at all.
- Follow each trip on the day and send your client a link to track their driver.
- Change or cancel a booking yourself, up to 24 hours before pick-up.
- Book a whole tour - every trip of a group itinerary - in one go, with one voucher file for the group.
- Download your invoices, see what is owing, and see the commission in your wallet.
- Give each person at your agency their own login, and see who booked what.

STEP BY STEP

Making your first booking

1 Sign in

- Go to www.skytransfers.com.au/agent.html and bookmark it. It is the only page you need.
- Enter your agent code and your PIN, then choose Sign in.
- You land on your dashboard: your wallet at the top, the booking form below it, then your bookings and your invoices.
- Five wrong PINs in a row locks the account for 15 minutes. If that happens, call us and we will clear it straight away.

2 Make a booking

- Choose One-way, Return (both legs, 10% off) or By the hour (3 to 6 hours, as directed).
- Choose the pick-up and the drop-off. Type an airport, a suburb, a hotel or a street address and pick it from the suggestions. Need to call somewhere on the way? Choose Add a stop - up to three.
- Every vehicle we can send appears with its price straight away, from a sedan to an 18-seat Mercedes Sprinter. Choose the one you want.
- Choose the date and the pick-up time (Brisbane time), and for a return the return date, time and flight.
- Add your passenger's name, phone and email - we email them their driver's details on the day - how many are travelling, the flight number, and your own booking reference if you use one. It prints on our invoice to you.
- The button at the bottom names the vehicle and the fare, so you see exactly what you are committing to. Choose it and the booking is made: you get a reference immediately, and so does our dispatch.

3 Download the voucher for your client

- Find the booking in your list and choose Voucher.
- A PDF downloads with the reference, the route and any stops, the date and time, the vehicle and what is included.
- It carries no prices at all. What you charge your client stays between you and them.

4 Follow the trip

- Your bookings list shows where each trip is: Booked, Driver confirmed, On the way, Driver has arrived, Passenger on board, Completed.
- Once we have sent the job to a chauffeur you see their first name and the car.
- Choose Copy tracking link to send your client their own live page. It shows the driver and where they are - never a price, and never the driver's phone number.

5 Change or cancel

- Choose Change on a booking to edit anything - the trip, the stops, the vehicle or the passenger. The form reopens with everything filled in and re-prices as you go.
- Choose Cancel to cancel it outright. Both stay open until 24 hours before pick-up, and dispatch is told the moment you do it.
- Inside 24 hours, call +61 481 437 772 and we will do whatever we can.

6 Book a whole tour in one go

- Fill in the first trip as normal, then choose Add this trip to a tour instead. The trip goes into the Tour box and the form clears for the next one - the passenger's details stay filled in.
- Add every trip of the itinerary the same way, up to 15. They line up in date order, each with its vehicle and fare, and a total at the bottom.
- Give the tour a name, such as the group or the lead passenger, and your own reference if you use one. Then choose Book all.
- Every trip is priced and checked again as it is booked, and either every trip is booked or none is - you never end up with half a group itinerary.
- Each trip is an ordinary booking with its own reference, so you can change or cancel any one of them. Tour voucher downloads one file for the group: the itinerary first, then a voucher for each trip.

7 Invoices, your statement and your wallet

- Once a month we invoice your trips at the full fare, with a GST tax invoice for every trip.
- Invoices & statement shows what is owing, anything overdue and any trips not invoiced yet. Download each invoice as a PDF, and pay by card from the invoice or by bank transfer using the details on it.
- Rather settle one trip by card? Choose Pay by card on the booking. Pay it there and then at the plain fare, or copy the link and send it to your client to pay with their own card. Once paid it comes off your monthly invoice.
- Your wallet, at the top, is your commission: what you have earned, what has been paid out and the balance we owe you. It is paid out to you separately from the invoices. A booking adds to it as soon as it is confirmed and comes off again if it is cancelled.

8 Give your team their own logins

- Signed in with your agency's own PIN, go to Your team at the bottom of the page. Enter the person's name, their email if you want them to get their own booking copies, and what they can see.
- Bookings only lets them book, change, cancel, download vouchers and follow trips. They see the fares, but not your commission, your wallet or your invoices. Manager sees everything and can manage the team too.
- Choose Add this person and the portal shows their own six-digit PIN once. Pass it to them yourself - we never email a PIN. They sign in with your agency code and that PIN.
- Every booking then shows who made it, and our dispatch is told too. New PIN replaces someone's PIN, and Switch off signs them out at once; their bookings stay exactly as they are.

GOOD TO KNOW

The details that come up most

- Fares are per vehicle, not per person. A sedan is one price for up to 3 passengers; an 18-seat Sprinter is one price for the whole group.
- Prices include GST and tolls, and a tax invoice is issued for every trip.
- Child seats are $15 each and a luggage trailer is $30. The Brisbane Cruise Terminal is the Brisbane Airport fare for that suburb plus $25.
- Airport pick-ups include meet and greet with a name board, and 30 minutes' free waiting after landing - 60 minutes for international arrivals at Brisbane.
- Online bookings close 6 hours before pick-up, so we can be certain a car and chauffeur are genuinely free. Inside that window call +61 481 437 772; we still take same-day work whenever a vehicle is available.
- The same fare applies at any hour. No surge, no night loading, no after-hours fee.
- Our line answers 24 hours a day, 7 days a week.

Tell us what else you need in the portal

Return trips, stops, live tracking, downloadable invoices, staff logins and whole-tour booking are all here because partners asked for them. If something is still missing, we want to hear it.

A saved list of regular passengers. A month-end report for your accounts team. Anything at all - tell us and we will look at building it.
